

Happy March, Residents and Families! We hope you have been enjoying this beautiful almost-Spring weather as much as we have. We are looking forward to the fact that we now will have more sunshine in our days and we have spent our month blooming with positive changes that we are so thrilled to share with you all!

Two weeks ago, we hosted our first in-person training since the pandemic began and also our first in our home office's city of Atlanta with our Resident Experience Leaders. It was such a delight to again witness first-hand the camaraderie between the Thrive Hive and community leaders on this scale. We were thankful to all be able to come together safely, collaborate, and converse on all of the changes we have faced recently and all of the amazing changes still to come.

A big update we are delighted to share that was heavily discussed at the training is that thanks to the multiple rounds of vaccine clinics hosted by either CVS/Omnicare or Walgreens in each of our communities, we are now able to make changes in various social aspects at each location. This is our official announcement that we are opening up family visitations at this time! To arrange, please contact your community's First Impressions Director to schedule a time with your loved one! These visits will vary by location, some occurring primarily outdoors while others will be able to host indoor visits as well. We are elated to be able to conduct these interactions again, but please be understanding as it pertains to time and safety measures being taken for all of our residents and team. Please also know we will keep everyone updated in a timely manner if we should have the need to suspend visits in the event of an outbreak or surge in numbers/positive cases in the community or local area. We will continue to follow all local health department, state, and CDC guidelines to ensure we are always being COVID-responsible. As always, we want to keep you fully informed and are including a link below to the CDC's Interim Public Health Recommendation for Fully Vaccinated People:

<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/fully-vaccinated-guidance.html>

We could never thank you enough for your continued trust & support and we hope you too are as excited about all of these updates as we are. Please reach out to VaccineHelpline@thrivesl.com if you should have any questions.

Be Well,
Nicole Moberg
